## I used to be a car tyre

- Four locking loops in the perfect position for locking wheels and frames
- Height and length of an adult cycle for secure leaning and to stop pedestrians tripping over cycle wheels
- Coated in soft flame resistant recycled car tyre rubber. This prevents paint chipping from cycle frames. Steel stands chip cycle paint
- Intuitive cycle stand sign post
- Captivating sculptural cycle symbol to celebrate and promote cycling
- Sculptural design adds aesthetic interest to public spaces
- Promotes tangible sustainable design and recycling through the use of recycled car tyres

**Bikerakk** bookending existing cycle stands

INNOVATIVE • SUSTAINABLE • CYCLE STAND
